Bengaluru, India 560058

## EDUCATION

Sri Krishna institute of technology - Karnataka, Bengaluru  
B TECH : Information Science and technology

## PROFESSIONAL SUMMARY

As an intermediate-level professional, I have a diverse skill set in **machine learning, Power BI, React.js, and full stack development**. I have experience developing ML models, creating interactive dashboards in Power BI, and building responsive web applications with React.js. I also have a strong background in ERP development and configuration, Python for data analysis and automation, and SQL for complex data manipulation. My adaptability allows me to quickly learn new technologies and excel in dynamic environments.

## SKILLS

Machine Learning	Python
Power BI	Figma
Web Development(React.js)	Full Stack
IOT and Robotics	SQL Programming

## PROFFESIONAL EXPERIENCE

**ERP Implementation Engineer** - Bengaluru, India | 05/2024 - 07/2024

- Developed a customized ERP solution for an industry, enhancing data accuracy by standardizing data entry practices across departments.
- Stayed current with industry trends and best practices to deliver cutting-edge ERP solutions.
- Collaborated with cross-functional teams for seamless system integration and automated key business processes to improve operational efficiency.
- Designed and implemented modules for inventory management, financial accounting, and customer relationship management.

## **ACHIEVEMENTS**

I have participated in over 8 hackathons, focusing on IoT, robotics, and software development, with two organized by the government. These experiences have honed my team management and communication skills. My achievements led to being selected for one of India's biggest tech events, where I was addressed by the founder of BoAt and the Honourable Prime Minister. Currently, I am working on machine learning projects, developing models to predict outcomes and solve real-world problems.
